

On the day of travel...

To help smooth your journey on the day here is some information about the arrangements and extra people on hand to help you at Birmingham International.

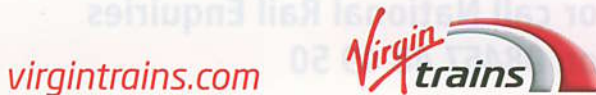

When improvement work takes place at Rugby, customers travelling to London have a choice of routes between Birmingham International and Euston. On arriving at Birmingham International, you can either take the hourly Super Voyager West Coast Replacement Shuttle service direct to London Euston, or the frequent non-stop coach to Northampton for a connecting Pendolino service to Euston.

All customers should change at Birmingham International for either route to London Euston.

At Birmingham International, customers should make their way to the main concourse, then down to the platform for the West Coast Replacement Shuttle or to the front of the station for the coach service to Northampton.

There will be people on the platforms and concourse to help you. Lifts are available on all platforms and toilets are located on the main concourse.

West Coast Replacement Shuttle services provided with thanks to...

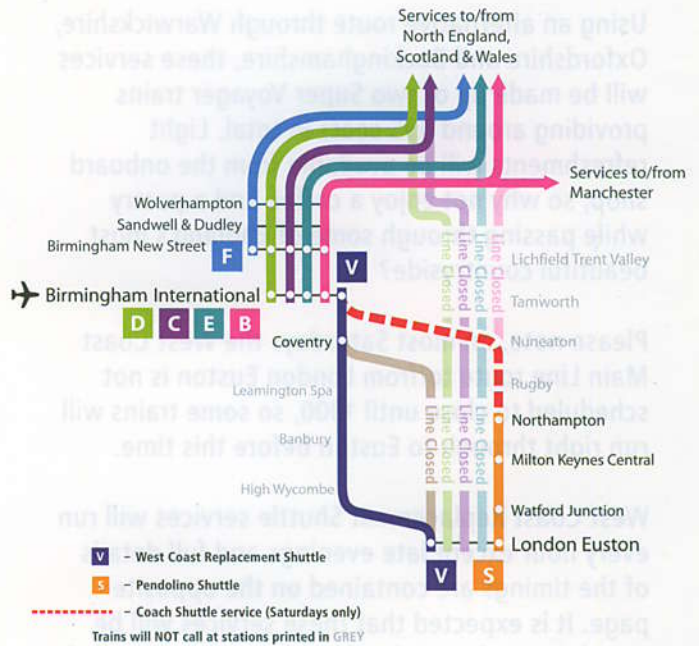

Special Timetable
